ABOUT ETEL

Since its founding in 1974, ETEL has grown steadily to become a leading supplier of high performance motion control components and complete motion platforms. ETEL is the preferred worldwide supplier that is 100 % dedicated to direct drive solutions. ETEL will maintain its leadership position by having:

- Continuous technological innovation.
- Leading-edge products and services.
- Uncompromising quality standards.
- Synergies within the HEIDENHAIN group that is already proven to be a winning combination.
- A stable working environment where employees can develop their expertise and contribute to success.

Our presence in a broad range of industries and experience with many demanding OEM manufacturers make us the perfect partner for companies looking for high precision, repeatability and long-life quality solutions.

Industry sectors

ETEL is a leading supplier of components and motion systems to the following industries.

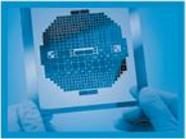

SEMICONDUCTORS

Wafer and die level packaging

Process control

Lithography

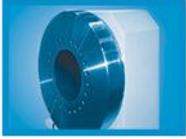

MACHINE TOOLS

Machining

Finishing / grinding

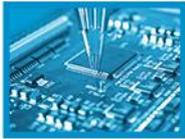

Tables / milling heads

Stamping / laser cutting

ELECTRONICS

Test and control equipment

Placement machines

OTHER SECTORS

Flat panel display (FPD)

Photovoltaic

Medical

Packaging

Optics

Printing / scanning

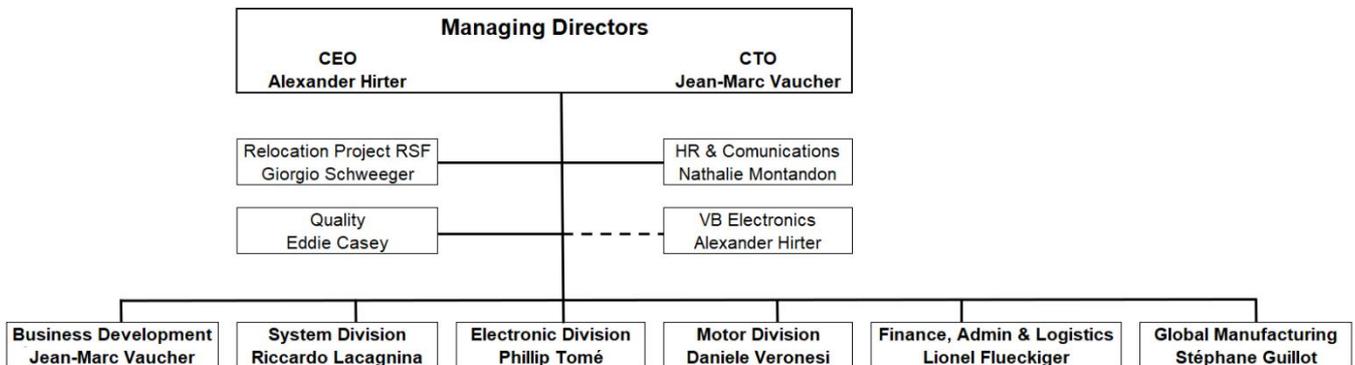

Telescopes

High level competences

In order to serve its customers, ETEL has developed a variety of competences allowing the delivery of appropriate capabilities to support the requirements of machine manufacturers.

- Hotline and technical support.
- Advanced trainings.
- Application oriented engineering.
- Mechatronic experts.

Our organization chart

QUALITY MANAGEMENT SYSTEM

ETEL has defined internal working rules in order to ensure compliance with international ISO 9001 standards (Quality requirements), and current safety and environmental regulations.

The Quality Management System ensures that the processes, responsibilities and roles are clearly defined. It also guarantees compliance with the relevant directives, rules, regulations and standards. This Quality Management System is the precondition for the realization of our objectives regarding quality as well as occupational health, safety and environment.

The Quality Management System documentation is composed of internal regulations, directives, instructions and forms, together with product and process specific instructions. The quality department provides and assures a terminology and a standardized form of representation.

All employees are autonomously responsible for compliance with the objectives of the Quality Management System and are supported by Quality Management. Direction and Quality Management regularly analyze and evaluate the quality status of products and processes through a monitoring system based on customer information, product and process indicators and internal audits.

The objective of occupational health and safety is to prevent accidents and avoid work related health risks for the welfare of our employees. With regard to working conditions, the legal requirements, directives and standards constitute the minimum criteria.

Moreover, ETEL ensures the compliance with the current environmental laws, ordinances and regulations in order to preserve the surrounding environment from pollution.

MANAGEMENT DECLARATION

ETEL technology (Motors, Electronic Control and Systems) and synergies with HEIDENHAIN technology (Measuring Systems, Electronic Control know-how and mechanical expertise) is contributing to the development of unique and leading Motion Positioning System products.

ETEL guarantees its success on the long term based on its Vision, Value and Mission (VVM) policy:

VISION	ETEL is the core brand for high precision and high dynamic motion technology in the HEIDENHAIN Group. As a competence center in Switzerland, we succeed in our current and future markets with competitive, innovative and high performing products and services.				
MISSION	CUSTOMERS	Together with the HEIDENHAIN Group, we strive to win and retain the respect and trust of our current and future customers.			
	PRODUCTS	Based on market needs, we develop high performance and competitive direct drive motors, motion controllers, motion systems and software solutions.			
	QUALITY	By producing with the help of the manufacturing network of HEIDENHAIN, we ensure the highest quality at the best cost for the entire value chain.			
	EMPLOYEES	With our highly qualified and skilled employees, we shape our future.			
	SUSTAINABILITY	We ensure our sustainability and our future by generating value, making smart decisions and acting with a long-term orientation.			
VALUES	RESPECT	TRUST	OWNERSHIP	EXCELLENCE	PASSION
					

To clearly and effectively translate the above VVM policy into daily practice, the management has defined internal regulations and directives that are binding policies for all employees.

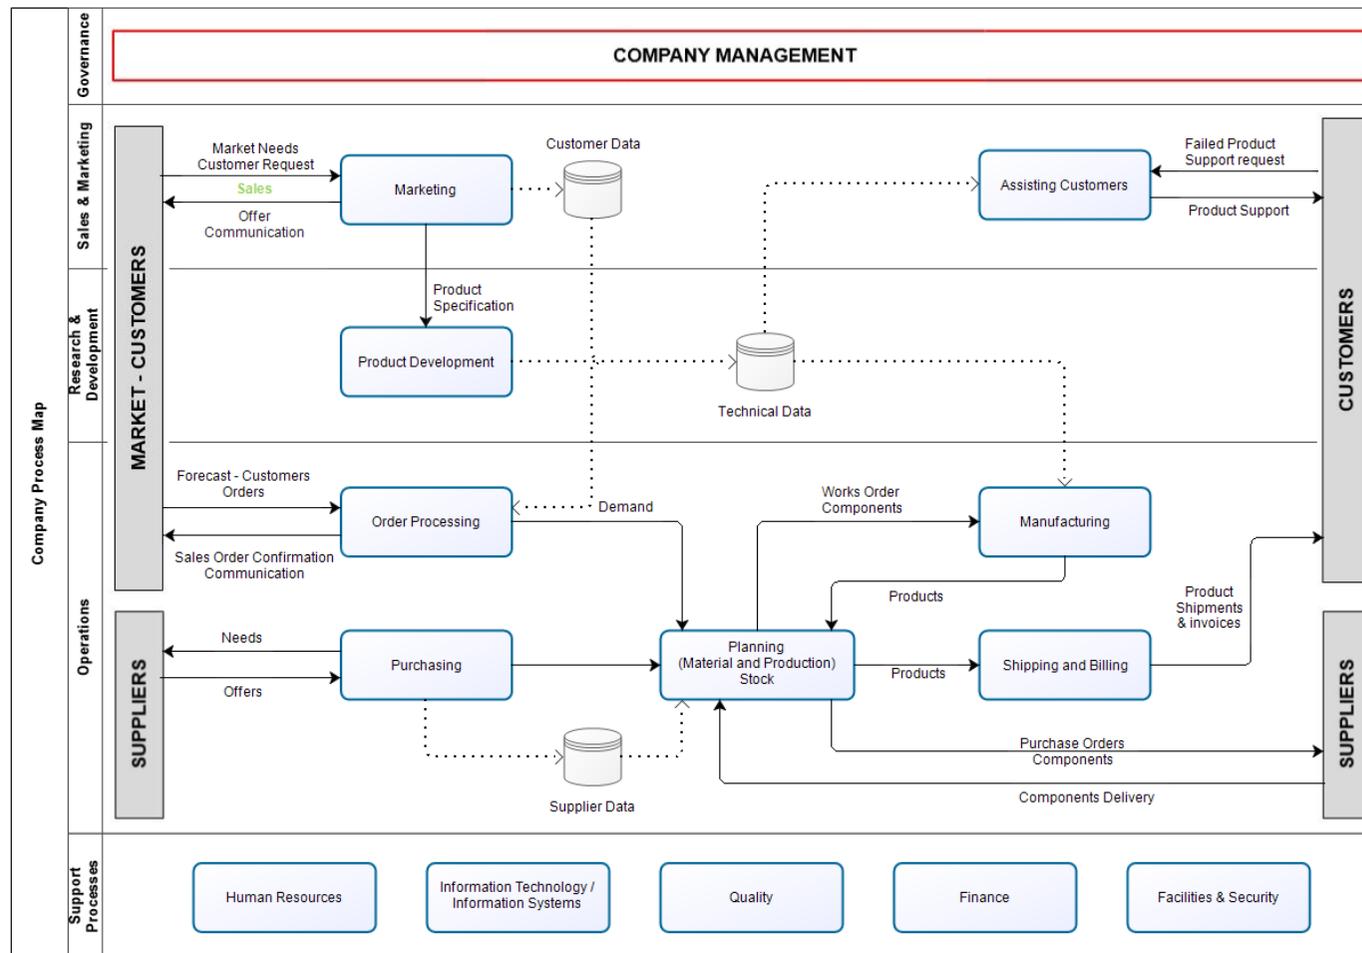

Every employee is expected to work and act on his own responsibility in compliance with the above.

Môtiers, Switzerland, April 2024

Alexander Hirter
 Chief Executive Officer

PROCESS MAPPING

ETEL's major processes are defined as illustrated below. The aim of this approach is the efficient and effective management of the main value added streams of the company, in order to fulfill our customers' needs and expectations. The sequence and interactions between processes are illustrated in the process map; management processes and support processes are related to all other processes.

PROCESS SCOPE

Management process:

- **Company Management:** the scope of this process is to ensure that ETEL's management system is relevant, appropriate and efficient through process and product performance reviews and continuous improvement.

Realization processes:

- **Marketing:** the scope of this process is to answer customer requests, as reported by sales (V-B), by proposing the best possible offers (products, prices and conditions) in order to best satisfy both our customers and the company's objectives while following the company strategy.
- **Assisting Customers:** the scope of this process is to fulfill our customers' requirements as far as technical and commercial support is concerned.
- **Product Development:** the scope of this process is to design and qualify new products, manufacturing methods and product documentation.
- **Manufacturing:** the scope of this process is to manufacture requested quantity, with required quality and within the time defined in the work order (assembling specifications, tests, inspection instructions and lead-time).
- **Order Processing:** the scope of this process is to deal with sales forecast, customer orders (order confirmation) and credit limits.
- **Planning:** the scope of this process is to optimize the production and provision of supplies in order to satisfy our customers' requests in term of delivery deadlines. This process gives an overview of the future production workload (up to 18 months) and provides the purchasing department with the future needs of components to allow negotiations with suppliers. It is also responsible for the control and analysis of the components and finished products stock.
- **Shipping & Billing:** the scope of this process is to ensure that the shipping of our products fulfills our customers' requirements and that we are conforming to the Swiss and International regulations in term of Exportation/Importation. It also includes billing activity.
- **Purchasing:** the scope of this process is to select, qualify and evaluate suppliers and subcontractors.

Support processes:

- **Human resources:** the scope of this process is to ensure that the company's workforce complies with its activities, as far as quantity (recruitment/lay-off) and personal or professional abilities (training) are concerned, for medium and long term, while implementing an initiative for employee development (evaluations). This process also checks the application of measures stipulated by the work Law (LTr).
- **Finances:** the scope of this process is to manage financial resources in order to ensure the sustainability of the company, that is to say, appropriate management of accounts, budgets granting by group, follow-up and management of investments, analysis of our products' costs and limitation of doubtful accounts.
- **IT/IS:** the scope of this process is to provide and maintain the IT/IS infrastructure and software to support processes according to agreed business requirements and to ensure the security of centrally stored, company data.
- **Quality:** the scope of this process is to implement, monitor and maintain a quality management system fitting with company principles and compliant with the international ISO 9001 standards.
- **Facilities and Security:** The role of this process is to provide, secure and maintain the facilities needed for the proper functioning of the company. Furthermore, it guarantees the employees safety at work and takes all the measures needed to prevent professional accidents and illnesses.
